

ANATOMY IN CLAY®

Professional Developments

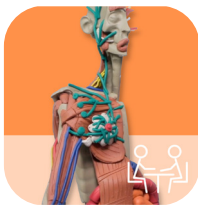

Attended by thousands of educators across the nation, our Professional Developments are designed to re-ignite passion in the classroom by implementing new ideas in experiential learning. Our active, hands-on approach to teaching anatomy empowers attendees to take back to their classrooms: anatomy content, new assessments, PBL lesson plans, teaching skills, and classroom management techniques -- all by building and connecting body systems in clay on a variety of "living" MANIKEN® human models.

FACE-TO-FACE

Privately Hosted Events

Privately hosted events are best if you need to organize Health Science Education for a large group, or if you are looking to fill specific Professional Development/In-Service dates. Benefits include:

- Travel to the location of your choice, limiting educators' travel expenses and prioritizing convenience.
- Minimum attendance is not required. The event will go on whether you have one attendee or fifty.
- An event exclusive to you, reengaging peer-to-peer collaboration.
- One flat rate based on number of attendees.
- Complete control over dates and times.

Anatomy On Demand™ Courses

Delivering the same exceptional content as our live events, our **ANATOMY ON DEMAND™** Professional Development Courses are a convenient, flexible, cost-effective, and reliable choice for your continuing education.

These self-guided options include:

- A minimum 90-day access. (Extensions and Lifetime Access are available and vary by course.)
- Materials shipped directly to you and yours to keep, including: **MANIKEN®** and/or **ARTHROLOGIK™** Joint Models, clay and tools.
- Comprehensive step-by-step videos, resources, and templates.
- Clear, straight-forward lessons and activities designed by experienced educators.
- Excerpts from our most popular **STEPBYSTEP™** Workbooks.
- Certificate of completion upon finishing course.
